## DETAILED ACTION

### IDS

The IDS listing has not been received.

### *Claim Objections*

Claim 12 is objected to because of the following informalities: the preamble “Component mounting and interconnect apparatus” should be corrected to --- **Optical** component mounting and interconnect apparatus ---.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 1, the claim fails to define the structure relationship between the layer of insulating material and 1<sup>st</sup> and 2<sup>nd</sup> opposed major surfaces.

The remaining claims depend on claim 1 and therefore are rejected.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7-10, and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Henson et al. (US 5,940,562).

With respect to claims 1-3, 5, 7-8, 10, 12 and 14, Henson et al. show in Figs. 4a and 4b an optical component mounting and interconnect apparatus comprising a base 10 including at least one layer of insulating material (col. 5, lines 14-16) with a plurality of vias including a signal via and the two ground vias parallel with an opposite side of the signal via, an edge emitting laser 30 (optical component) (col. 5, line 38) having an electrical terminal affixed to the 1<sup>st</sup> end of the signal via, and a flex circuit 40 with an electrical connection to the 2<sup>nd</sup> end of the signal via.

With respect to claims 4, 9, and 13, Henson et al. disclose the base 10 including plastic (col. 5, lines 15-17).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6, 11, and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Henson et al. (US 5,940,562) in view of Edwards et al. (US 2003/0103740). Henson et al. disclose all the limitations of the claims except for the lens block. Edwards et al. teach in Fig. 7c the lens block. For the benefit of receiving the light from laser and redirecting the light in the optical component mounting, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Henson et al. a lens block as taught by Edwards et al.

**Citation of The Pertinent References**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: US 2002/0101816, 2002/0191910, 2002/0031313, 2002/0114589, and 6404960.

**Communication Information**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dung (Michael) T Nguyen whose telephone number is (703) 305-7159. The examiner can normally be reached on 8:30 - 17:00.

Art Unit: 2828

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Ip can be reached on (703) 308-3098. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 306-5511 for regular communications and (703) 306-5511 for After Final communications.
